## MSM800/1200

A top-notch machine for packing liquids in sachets, designed for making medicines. It follows the strict rules of the medicine-making industry. The MSM1200 is special because it uses peristaltic pumps. These pumps are great because they're easy to clean and quick to set up for different tasks. This machine works fast and can handle up to 80 cycles per minute without any trouble. It's built strong to keep going without stopping, and its smart controls make sure every sachet is filled just right. With the MSM1200, you get a reliable machine that makes packing liquids simple and efficient.
